

An Everyday Mathematics Lesson

Most daily lessons in *Everyday Mathematics* follow the structure below. In each lesson, there are warm-up activities, focused instructional time, and activities that provide practice and review of skills already learned. This review is essential for developing and maintaining skills.

Lesson plans always include options for meeting the needs of different types of learners. A teacher may choose to work with small groups or with individuals who would benefit from support in the form of previewing lesson content, providing multiple avenues for acquiring skills, extending concepts, or developing English language abilities.
